receptor like protein kinase - Arabidopsis thaliana
N;Alternate names: protein F7A7.80
C;Specias: Arabidopsis thaliana (mouse-car cress)
C;Date: 20-Apr-2000 #sequence_revision 20-Apr-2000 #text_change 15-Sep-2000
C;Accession: 748177
R;Bevan, M; Terryn, N; Ardiles, W; Buysshaert, C; Dasseville, R.; De Clerck, ewes, H.W.; Rudd, S.; Lemcke, K.; Mayer, K.F.X.
submitted to the protein Sequence Database, March 2000

serine/threonine-protein kinase ctrl - Arabidopsis thaliana
N;Alternate names: protein F17C15.150
C;Specites: Arabidopsis thaliana (mouse-ear cress)
C;Date: 20-Apr-2000 #sequence_revision 20-Apr-2000 #text_change 17-Nov-2000
C;Accession: T48400; A45178
R;Bevan, M.; Pohl, T.; Weizenegger, T.; Bancroft, I.; Mewes, H.W.; Rudd, S.;
submitted to the Protein Sequence Database, March 2000 I.; Mewes, H.W.; Rudd, S.; 2000 Lencke,

A:Experimental source: cultivar Columbia: BAC clone F17C15
R:Kieber, J.J.; Rothenberg, M.; Roman, G.; Feldmann, K.A.; Ecker, J.R.
Cell 72, 427-441, 1993
A;Title: CTR1, a negative regulator of the ethylene response pathway in A;Reference number: A45178; MUID:93161417
A;Contents: Columbia Arabidopsis,

A;Note: F17C15.150 C;Superfamily: unassigned Ser/Thr or Tyr-specific protein kinases; protein kinase hom C;Repwords: AIP F;549-812/Domain: protein kinase homology <KIN> F;557-565/Region: protein kinase ATP-binding motif A; Introns: 216/3; 317/2; 364/3; 399/2; 468/1; 560/1; 573/3; 596/3; 630/2; 658/3; 691/ A;Accession: A45178
A;Status: preliminary; not compared with conceptual translation

MEDLINE-95277838; Pubmed-7538908;

Stanger B.Z., Leder P., Lee T.-H., Kim E., Seed B.;

*RIP: a novel protein containing a death domain that interacts with

*RIP: a novel protein containing a death domain that interacts with

*RIP: a novel protein containing a death domain that interacts with

*RIP: a novel protein containing a death domain of FAS AND TRADD AND

*Cell B1:513-523(1995).

**IP CENCITION: INTERACTS WITH THE DEATH DOMAIN OF FAS AND TRADD AND

**INITIATES APOPTOSIS. IT IS RECRUITED BY TRADD TO TWERI IN A TNF-

**DEPENDENT PROCESS. REQUIRED FOR TWERI ACTIVATION OF MF-KAPPA B.

**INITIARITY: BELONGS TO THE SER/THR PANILY OF PROTEIN KINASES.**

**INITIARITY: CONTAINS 1 DEATH DOMAIN.**
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             PROSITE; PS00108; PROTEIN_KINASE_ST; PROSITE; PS50011; PROTEIN_KINASE_DOM; PROSITE; PS50017; DEATH_DONAIN; 1

I'dentification of a member of the MAPKKK family as a potential

"Identification of a signal transduction.";

In mediator of TgF-beta signal transduction.";

C-1- FUNCTION: CAN PHOSPHORITATE AND ACTIVATE YET UNDEFINED MAPKKS.

C-1- FUNCTION: CAN PHOSPHORITATE AND ACTIVATE YET UNDEFINED MAPKKS.

CC MEDIATOR OF TGF-BETA SIGNAL TRANSDUCTION. STIMULATES NF-KAPPA B

CC -1- SIMILARITY: BELONGS TO THE SER/THR FAMILY OF PROTEIN KINASES.

CC MAP KINASE KINASE SUBFAMILY.

CC -1- SIMILARITY: IN THE C-TERMINAL SECTION: STRONG, TO C210RP7.

DOTOW D.S., Devereux L., Dietzsch E., de Kretser T.;

"Identification of a new family of human epithelial protein kinas, "

containing two leucine/isoleucine-zipper domains.";

EUT. J. Biochem. 1313:701-710(193).

-I- CATALYTIC ACTIVITY: ATP + a protein - ADP + a phosphoprotein.

-I- TISSUE SPECIFICITY: EXPRESSED IN BRAIN AND SKELETAL MUSCLE.

-I- SINILARITY: BUCONGS TO THE SER/THR FAMILY OF PROTEIN KINASES.

MAP KINASE KINASE KINASE SUBFAMILY.

-I- SIMILARITY: CONTAINS 1 SH3 DOMAIN.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            MEDLINE-96128179; PubMed-8536694;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Nature 408:823-826(2000)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              MEDLINE-21016721;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   CATALYTIC ACTIVITY: ATP + a protein - ADP + a phosphoprotein.
TISSUE SPECIFICITY: EXPRESSED IN BOTH SEEDLINGS AND ADUIT PLANTS
MISCELLANEOUS: CTR1 MUTANTS DISPLAY ETHYLENE-TREATED PHENOTYPES,
RESULTING IN PLANTS WITH SMALL, UNEXPANDED LEAVES AND WHOSE SEED
COTYLEDON GROWTH IS IMPAIRED.
SIMILARITY: BELONGS TO THE SER/THR FAMILY OF PROTEIN KINASES.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     MIL/RAF SUBFAMILY.
